

Weekly Meeting 10/13

Kavya: I created the signup page using figma and collaborated with the team to finalize the conditions and the main screens of the website

Niharika: I created the UI for what the Chatbot would look like and inspected which API to use

Lakshmi: I worked on setting up the JWT(Java Web Tokens) for hashing and encrypting the password - also defined authentication API endpoints

Adithya: Drew up pros-cons sheetlist and brainstormed the concept and integration of django and flask. Worked on data structure code and tweaked figma.
